

Retrofitting - As simple as 1, 2, 3!

1

Red-White Valve Corp. is proud to announce a compression end ball valve, figure number 5065. This 600# WOG* brass ball valve is perfect for retrofit applications or installations where sweating a valve into a system is not feasible.

The unique compression fitting system is designed for ease of installation and durable performance. All 5065 valves are full port and have NSF 61 certification for drinking water.

No torch or special tools are needed to install this valve. Simply slip the included compression nut and ferrule over the pipe end and tighten. It's as easy as that.

2

This sturdy valve features PTFE seats, a 2-piece body and a chrome plated ball. It is available in 1/2" through 1" sizes. Simply put, it can handle your toughest plumbing needs.

Save time and money with this problem solving valve!

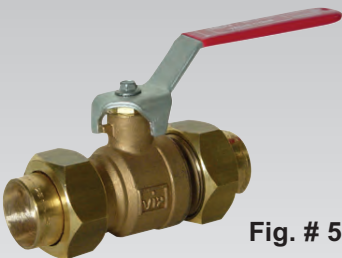

Fig. # 5066

Also available is the 5066 union/solder end valve. It features a 150# WSP/600# WOG rating and provides positive union end seals. Available in 1/2" - 1" sizes
